

TECHNICAL SPECIFICATION SHEET

Candy

Intermediate Onion

This versatile mid-day onion is a favorite in many areas across the U.S. because of its ability to produce jumbo-sized bulbs very early in the harvest season. The tops are short and sturdy and the necks are small and tight for quick curing. Candy performs well from transplants as well as direct seeded for added jump on the market, and is an ideal season starter.

| Variety | Relative Maturity | Bulb Shape | Grade Range | Skin Color | Storage Potential | Disease Resistance |
|---------|-------------------|------------|-------------|--------------|-------------------|--------------------|
| Candy | 95 days | Globe | J-C | Light Bronze | 0 months | PR (IR) |
